## SESSION SUMMARY

LNG Canada hosted the Social Management Roundtable (SMR) Education working group at Kitimat City High on November 20, 2023. SMR continued November 21 and 22 hosted in Terrace at the Terrace Sportsplex, which included:

- Housing & Accommodation,
- Community Health,
- Emergency Response & Traffic,
- Solid Waste, and
- Introduction to Flaring.

Highlights of the November 2023 SMR was building a greater understanding of LNG Canada's safe startup plan, including flaring, as well as having preliminary discussions on the demobilization plans for 2024. This report focuses on summarizing discussions throughout SMR as well as tracking actions. Additional information provided at the end of the report includes Q3 2023 project metrics and 2024 SMR details.

## WORKFORCE UPDATE

Through 2023, the Project continues to limit the number of relocated workers and prioritize the use of workforce accommodation centres with a peak population of 4,267 staying at Cedar Valley Lodge in September 2023. Table 1 shows minimum, maximum, and average bed stays at Cedar Valley Lodge for Q2 & Q3 2023.

**Table 1 Cedar Valley Lodge Q2 2023 Occupancy**

	April	May	June	July	August	Sept
Minimum Occupancy	3,600	3,709	3,805	3,888	3,906	3,930
Maximum Occupancy	3,950	3,995	4,267	4,191	4,255	4,267
Average Daily Occupancy	3,826	3,881	4,057	4,074	4,129	4,148

Women and Indigenous workers self-identify during site orientation. Table 2 summarizes the percent of workforce that have self-identified as a woman and/or Indigenous as well as individuals participating in apprenticeships.

**Table 2 Workforce Trends, Q2 & Q3 2023**

	April	May	June	July	August	Sept
<b>Apprentices</b>	11%	12%	12%	13%	12%	13%
<b>Indigenous</b>	6%	7%	7%	7%	7%	6%
<b>Women</b>	11%	12%	12%	11%	11%	11%

## HOUSING & ACCOMMODATION

### Company Provided Housing

A peak of 161 Project staff were living in company provided housing during Q3 2023. Company provided housing is procured through long-term leases, including a mix of new construction, refurbished units, and existing units, as shown in Table 3. Two new refurbished units were added to Kitimat’s portfolio in Q3 with no changes in Terrace.

**Table 3 Lease Breakdown by Location**

	<b>Kitimat</b>	<b>Terrace</b>
<b>New</b>	77	13
<b>Refurbished</b>	17	0
<b>Existing</b>	27	2
<i>Q2 – Q3 change</i>	+2	+0

### Workforce Accommodation Centres Update

Workforce ramp up is expected to continue to the end of 2023 and into 2024. Cedar Valley Lodge reached capacity mid-2023 and the project began using of alternative workforce accommodations in Kitimat. The project anticipates that the use of open lodges will be required into mid-2024.

	<b>July</b>	<b>August</b>	<b>September</b>
<b># workers in open lodges</b>	727	627	604

## Discussion

During the November 2023 working group session, LNG Canada provided an update on the workforce accommodation strategy and the use of open lodges. All components of the Housing Strategy for Phase 1 have been implemented. LNG Canada clarified that the housing renovation incentive will continue beyond the construction of Phase 1 and has been extended to include employees choosing to live in Terrace. Clarification was also provided that the future of CVL has not yet been determined. When appropriate, stakeholders will be included in discussing some options; however, there is a commercial element to demobilizing CVL.

The Project anticipates continuing the use of open lodges into mid-2024. The District of Kitimat asked for clarification if workers are allowed to stay in airBNBs or rooming houses.<sup>1</sup> LNG Canada confirmed that employees flying into Kitimat to support construction are not given options on the preferred type of housing but rather told where they are staying. Further context was provided into the overall workforce accommodation strategy. Information on how to report potential breaches to LNG Canada's housing commitments was shared with participants.

LNG Canada reconfirmed that the use of hotels are restricted to individuals who are not actively working on the construction scopes, such as corporate relations, leadership, and engagement leads. Kitimat Chamber of Commerce indicated that local hotels are busy weekdays but have high vacancy rates on weekends.

Participants were asked if they had noticed increased activities or interactions in community due to the Project's use of open lodges. No concerns were raised, and the District of Kitimat indicated there has not been a huge impact in community from the use of open lodges.

The Kitimat Chamber of Commerce noted that they are working with retirees to see if there is local capacity to host healthcare workers and teachers as an alternative housing approach. LNG Canada built on the Chamber's update noting there are discussions with Northern Health about the potential of subletting corporate leases that may be vacated early by project staff.

The District of Kitimat updated participants on the current vacancy rate in Kitimat, which is believed to be sitting around 10-15%. The vacancy rate presented disregards houses or units that are not habitable to have a realistic understanding. The Kitimat Chamber of Commerce further commented that there is a challenge to recruit individuals to Kitimat based on housing affordability and availability.

---

<sup>11</sup> The District of Kitimat defines rooming house as a dwelling where more than three bedroom are rented out, not including homeowner and family members.

### Potential May 2024 SMR Topics

1. Demobilization plans for housing
  - a. Highlight the experience in Terrace with CGL demobilizing
2. Cedar Valley Lodge update
3. BC Housing update & discussion

### Housing & Accommodation Action Items

**2023-18** LNG Canada to consider inviting local developers to present at SMR.

Status: Open.

**2023-19** LNG Canada to report on the number of LNG Canada direct hires.

Status: Closed. As of November 30, 2023, there are 259 direct hire employees.

## COMMUNITY HEALTH

### Discussion

During the SMR working group session, participants discussed their organization's experience with drugs in the community, demobilization, operational outlook, and injury reporting.

#### Drugs in the Communities

Northern Health raised the BC Coroner's Report, which emphasized that Northwest BC has the highest, per capita, rate of overdoses with specific mention of Kitimat and Terrace. Prior to November 2020, TSW had never required the use of Naloxone at their sites; however, there has been a shift. In October 2023, 3-4 kits were used by TSW staff. There are some overdoses from the same clients, but the increase is being noticed at the community-level. Kitimat RCMP noted that there is an understanding that many overdoses are not reported to them as there is no requirement. Participants also described Kitimat's drug landscape to be more hidden than in other communities and is often referred to as having higher use of expensive drugs. When considering what LNG Canada can do to support this area, Northern Health encouraged everyone to have Naloxone available and easily accessible and to increase education.

Kitsumkalum noted that there is a stronger presence of those without a home and/or are struggling with substance abuse and asked if there is potential that these individuals are moving to the Northwest based on promised opportunities and employment. Northern Health confirmed that this is an issue across the province and there are many factors; however, there is no direct correlation to industrial presence that can be drawn. LNG Canada recalled that in the early days close to FID, there were instances where individuals showed up assuming they could walk on the job site that day with no screening. This has changed over time as LNG Canada has maintained the same messaging and hiring standards, which does not allow for walk-ons.

#### Injury Reporting

Kitimat RCMP mentioned that they are currently working with LNG Canada to discuss their workplace injury policy and reporting. There is a potential gap was identified in the notification process that needs to be worked through (**Action 2023-20**).

#### Operational Outlook & Forecast

Kylie Clark, LNG Canada Health Advisor, attended SMR to discuss her role and current focus areas. The current work scope is focused on policy development while LNG Canada's first aid clinic is getting set-up. Clarification was provided that the site is still utilizing JFJV's medical

services as LNG Canada is still setting up the facility. There is no set date as to when the clinic will be open and there will be clear communication regarding the transition.

Participants inquired about recruitment plans for LNG Canada medical services as there is already a shortage of medical professionals in the community. At this time, there will only be one Health Advisor with the support of a Physician via Telehealth. While that is the current staffing plans, it was noted that LNG Canada cannot stop people from applying for jobs at site or elsewhere in the region. LNG Canada noted there is ongoing support for the development of the Healthcare Strategy currently being led by the District of Kitimat and Northern Health.

Northern Health indicated there is a need to better understand triggers for scaling up or down the medical services on-site as this will impact Mills Memorial Hospital industrial transportation protocol (**Action 2023-21**). In addition to discussing industrial transportation protocol, Northern Health requested an update on workforce forecasting (**Action 2023-22**).

### Demobilization

Participants were keen to better understand the demobilization plans that LNG Canada will be following in the coming months. Particular interest was raised regarding the potential of hiring demobilized workers and the negative social impacts. Areas of concern included increased substance abuse and domestic violence due to additional stress from loss of income. LNG Canada noted that many employees are anticipated to move onto the next project. For those that do need support finding a new role, LNG Canada funds a trades coordinator at BCCA who matches potential candidates with other work opportunities.

### **Potential May 2024 SMR Topics**

- What supports are offered to the workforce as they are demobilized

### **Community Health Action Items**

<b>2023-20</b>	LNG Canada and Kitimat RCMP meet with discuss injury reporting protocol. Status: Open.
<b>2023-21</b>	LNG Canada, JFJV, and Northern Health meet to discuss medical service triggers and the industrial transportation protocol. Status: Open.
<b>2023-22</b>	LNG Canada will provide an update on workforce forecasting. Status: Open.
<b>2023-23</b>	LNG Canada and Northern Health to connect on potential committees that exist in supporting placement of workers. Status: Open.

## EMERGENCY RESPONSE & TRAFFIC

### Discussion

#### Operational Forecast & Training

Sebastian Rus, LNG Canada Emergency Response Coordinator, attended SMR to highlight current training plans. LNG Canada's Emergency Response team will be made up of approximately 80 people, which are beginning to go through training for firefighting and incident command systems. Summary of training noted during the discussion:

1. LNG Canada has been working with local fire fighting stations for training, such as pumper training.
2. Before hydrocarbon introduction, there will be weekly<sup>2</sup> exercises and drills as well as quarterly Incident Management Team training.
  - a. Two more scenario exercises are planned before the introduction of hydrocarbons. Northern health requested an invitation to the scenario meetings (**Action 2023-24**).
3. Following Commissioning and Startup, LNG Canada will have a spill response, medical response, and security teams.

Participants requested an opportunity to attend a training exercise on-site and to do a walk through of LNG Canada's process for emergency events. The intent is to also review notification processes and talk through the formal process (**Action 2023-25**).

In addition to attending a training exercise on-site, there was a request to better understand the region's response capabilities as a collective. LNG Canada is currently working on mutual aid agreements with the intent of building out a register of equipment and how coordination would work. Mutual aid agreements will support the dialogue and exercises for the Regional Emergency Management Committee noted below.

#### Spill Response, Notifications & Jurisdiction

Participants asked if spill response includes the marine environment. LNG Canada provided an overview of the two spill response teams as materials will be transported via water and rail. WCMRC is contracted to support any response required in the marine environment. Typically, the WCMRC response time from Prince Rupert is 4-5 hours; however, there is a facility nearby with the support of Bridgemans.

---

<sup>2</sup> Weekly training will result in each team receiving monthly training based on shift schedule.

Northern Health raised a concern about notification of spills. If the Coast Guard isn't triggered, northern health will not be aware of the incident. Participants discussed how each organization needs to know what is happening for their own processes to begin. Despite the need for information, the District of Kitimat clarified that it would be within the municipality's jurisdiction. If it's within the municipal jurisdiction, everything would then be filtered through the municipality to other agencies.

The District of Kitimat asked if there is a comprehensive list of chemicals that will be stored on-site. LNG Canada has shared the chemical list with KFAS and NHA in August 2023 and recirculated December 5, 2023 following the SMR discussion.

### Future of Workforce Accommodation Centres

The future of open lodges was discussed and what could occur if Phase 2 were to have a positive FID. Both Sitka and Crossroads Lodges are considered open lodges that can have guests from many projects and companies. Other projects and companies, such as Cedar LNG will likely be using open lodges; however, that is a commercial agreement that LNG Canada is not part of. The District of Kitimat indicated that the land use for the open lodges expires in 2030.

### Traffic Updates

District of Kitimat and RCMP indicated the weekly traffic updates are helpful and asked if there were any anticipated spikes in equipment being moved out of Kitimat. LNG Canada noted that over the next six months, the community will see some equipment, cranes and trailers leaving the site. Anticipated increase in traffic will be noticeable in February and March.

Kitimat RCMP requested additional information on anticipated flight schedules and cancellation processes to support the detachment in understanding workforce travel trends in community. To date the information received has been very helpful and there is interest in continuing the conversations into the next phase of the project. LNG Canada committed to meeting with the RCMP once the Site Security Risk Assessment was complete (**Action 2023-26**).

### Regional Emergency Management Planning

The Regional Emergency Management Committee provided a brief update and defined the purpose of the multi-agency group as building greater understanding and broader lens on the risk and vulnerabilities in the region. Having multiple industrial and resource-driven sectors in the region increases and changes the risk and vulnerabilities. The Committee is planning for a regional exercise to be conducted in February 2024.

The question was raised where local emergency management committees and industry fit into the context. Is there is determining factor between a local and regional emergency management team being responsible for an incident? Participants discussed that it rests with the local emergency management team (e.g., the municipality) that brings in other agencies and industry, when appropriate.

With respect to notification process, participants discussed the different responsibility in notifying local emergency management coordinators and BCER. LNG Canada clarified that both processes are required. The BCER regulatory requirement is for training and drills, which the Project is now exceeding the basic requirements.

### Potential May 2024 SMR Topics

1. Roles and responsibilities during transition from construction to operations
2. Impacts and forecasted changes in traffic and emergency response responsibilities
  - a. Consider how the risk profile changes between project phases
3. Overview of protocol for cancelled flights and anticipated flight schedules in 2024
4. How demobilization may look and feel like in the community

### ER & Traffic Action Items

<b>2023-24</b>	LNG Canada look to invite Northern Health to scenario training meetings. Status: Open.
<b>2023-25</b>	LNG Canada look to invite DOK, NHA, EMCR, HEMBC and RCMP to observe an on-site exercise. Status: Open.
<b>2023-26</b>	LNG Canada will meet with RCMP once the Site Security Risk Assessment is complete. Status: Open.

## SOLID WASTE

### Discussion

#### On-site Diversion

The District of Kitimat asked where the project's cardboard is going and if the project is using KUTE. LNG Canada and JFJV confirmed that they are using Do Your Part for recycling and concrete is going to Sandhill. The Project Team noted that KUTE was used in the early days of the project but there is limited capacity at KUTE. Kitsumkalum asked the Project what volume of waste goes to RDKS and RDBN. Participants reviewed the waste data table for exact units.

#### Updates from Previous Initiatives

JFJV provided a brief overview of the three-month pilot agreed upon at the May 2023 SMR, where the project began bringing loads of waste from site back to Forceman Ridge. As part of the overview, improvements and initiatives at CVL were noted:

- Decreasing plastic cups on-site (saved over 2,000 plastic cups by giving out reusable mugs);
- Currently using up inventory of paper bags in lunch area and transitioning to only reusable lunch kits;
- Education material shared around site and projected on the TVs in lobby;
- Increased material used in the orientation program (video, hands on activity, and Q&A)
- Individuals attending toolbox meetings to increase awareness;
- Continued inspections; and
- Addition of another MSW bin to separate it from site waste.

Since the conclusion of the pilot in August, waste has continued to be brought to Forceman Ridge with only spot inspections occurring.

#### Participant Updates

- District of Kitimat*
- November 2023, approval to have tipping fees at landfill
  - Council is currently considering other waste management measures such as reducing the number of garbage bins allowed at curbside
  - Successfully received a grant for a compost facility that is anticipated to be operational in 2024. There was a gap between the initial project costs and where bids came in. LNG Canada is providing funding to the District of Kitimat as part of the impact management and mitigations

### **Solid Waste Action Items**

- 2023-27**      Share LNG Canada’s waste jeopardy game with RDKS.  
  
Status:          Open.
- 2023-28**      Assess Project’s ability to provide Forceman Ridge a site tour around safety day.  
  
Status:          Open.
- 2023-29**      Share contact information from participants with JFJV Site Services to discuss needs and potential support recycling used material (e.g., concrete barriers).  
  
Status:          Closed. Contact information was emailed to JFJV 5 Dec 2023.

## EDUCATION

The intent of the Education Working Group session was to build on the work from the May and November 2023 SMR working group sessions and to discuss any further impacts felt through the first semester of the school year.

LNG Canada provided a high-level staffing update noting that 90% of the operational workforce has been hired and would already be integrated into the schools. There is an anticipated decrease in enrolment in 2024 and 2025 due to demobilization of the construction workforce. Where possible, demobilization dates for individuals with children will align with the school year to minimize interruptions for the school and families. It will not always be possible, but it is a factor considered in the planning phase. LNG Canada will provide updated forecasting in early Q1 2023 for CMSD82 budgeting process (**Action 2023-30**).

Both Kildala and Nechako Elementary's before and after school programs have spots available. They are each staffed for 12 children but can expand up to 24 based on the license. CMSD82 was not sure if they would be allowed to accept children from St. Anthony's based on transportation requirement and insurance complications.

A general discussion was had regarding workforce development and how to educate students on the many forms of jobs associated with industry. During the discussion, LNG Canada spoke to upcoming opportunities in both Kitimat and Terrace. CMSD82 identified that children wishing to participate in Terrace programming may not be able to due to a lack of transportation. It was requested that if the schools hear feedback about barriers to accessing the programs, that the information be relayed to LNG Canada for further consideration.

Having LNG Canada present in classroom and speaking to employment topics was raised as an opportunity to explore in 2024. CMSD82 Principals expressed interest in having students exposed to more than trades and engineering, which is common in the classrooms. Potential career discussions that students may not be familiar with included Human Resources, Corporate Relations, and Digitization. To further build on increasing awareness with students, LNG Canada offered to meet with career counsellors to continue the dialogue (**Action 2023-31**).

### Updates from Previous Initiatives and Action Items

- CMSD82 noted that there is already noticeable improvement with the implementation of the K-3 Literacy Program that LNG Canada supported in July 2023.
- The hiring incentive provided by LNG Canada was helpful in recruiting teachers to Kitimat. There is potential for a need for more funding (**Action 2023-32**).

## Education Action Items

- 2023-15** LNG Canada and CMSD82 discuss potential funding to support UNBC program delivery to unlicensed teachers in Kitimat.
- Status: Open. CMSD82 and LNG Canada met on November 6<sup>th</sup> to discuss application made to the Province of BC as well as potential support. Discussions will continue in Q1 2024.
- 2023-16** LNG Canada and CMSD82 discuss funding opportunity to support having practicum students placed in region through the UBC Community Stay Experience program.
- Status: Closed. CMSD82 and LNG Canada met on November 6<sup>th</sup> to discuss potential support.
- 2023-17** LNG Canada will reach out CMSD82 and St. Anthony's in the Fall to discuss training and development opportunities for current teachers.
- Status: Open. Preliminary discussions occurred with CMSD82 and St. Anthony's. Continued discussion will occur in Q1 2024.
- 2023-30** LNG Canada to discuss demobilization forecasts with CMSD82 and St. Anthony's in Q1 2024 to support provincial budgeting requirements. Must be provided by March at the very latest.
- Status: Open.
- 2023-30** LNG Canada to provide permanent workforce and demobilization data.
- Status: Open.
- 2023-31** CMSD82 and LNG Canada meet in Q1 2024 to discuss opportunities to work with career counsellors.
- Status: Open.
- 2023-32** CMSD82 determine if further support is needed for the hiring incentive for the 2024/2025 school year.
- Status: Open.
- 2023-33** Request that the January site tour offered to teachers be expanded beyond solely teachers but also support roles.
- Status: Open.
- 2023-34** CMSD82 and LNG Canada's Workforce Development meet to discuss programming options in the schools and during spring break.
- Status: Open.

## COMMISSIONING & SAFE STARTUP

LNG Canada presented on the Project's plan for commissioning and safe start-up, with emphasis on flaring and what the participants can expect in 2024. Participants had an opportunity to ask questions related to flaring and plant start up.

## SOCIAL MANAGEMENT PLAN MONITORING Q3 2023

Table 4 to Table 7 summarize the Project data for July to September 2023. Metrics are gathered through LNG Canada and JFJV internal reporting systems with respect to movement and activities of workforce and equipment to support construction activities at the LNG Plant site in Kitimat.

**Table 4 Housing & Accommodation Metrics, Q3 2023**

	July	August	September
Project local (resident) workforce	764	757	683
Project non-local workforce temporarily housed at Cedar Valley Lodge ( <b>max # guests</b> )	4,191	4,255	4,267
Project non-local workforce temporarily housed at Cedar Valley Lodge ( <b>min # guests</b> )	3,888	3,906	3,930
Project staff re-located to Kitimat, presently staying in company provided housing	149	157	111
Accompanying partner or spouses of relocated Project Staff	81	83	85
Number of housing-related concerns or complaints	0	0	0

**Table 5 Traffic Metrics, Q3 2023**

	July	August	September
Number of daily Project bus trips from Northwest Regional Airport (YXT) to Kitimat (avg. passengers /day). <sup>3</sup>	16 (300)	19 (320)	17 (310)
Number of daily Project bus trips from Terrace Park & Ride to Kitimat (avg. passengers/day) <sup>3</sup>	14 (63)	14 (72)	13 (72)
Number of daily Project bus trips from Kitimat and Kitimaat Village Park & Ride to Site (avg. passengers /day) <sup>3</sup>	18 (285)	19 (290)	18 (281)
Total number of road transport-related incidents and near misses <sup>4</sup>	4	6	2
Number of Project personnel on commercial flights through airport per month	321	411	297
Number of Project personnel on charter flights	9,247	10,041	9157
Provision of Project transportation plans to transportation authorities	0	0	0
Notifications to service providers and the public regarding scheduling of transportation equipment	0	0	0
Number of meetings with transportation authorities on traffic management, congestion, and road safety	1	0	0
Number of traffic-related concerns or complaints	2 <sup>5</sup>	0	0

<sup>3</sup> Avg. passengers per day rounded up to whole numbers.

<sup>4</sup> 10 incidents occurred onsite and 2 offsite. 8 resulted in property damage, 2 near miss, 2 MVIs (1 onsite, 1 offsite), and no injuries. Offsite MVI results from a personal vehicle striking a project bus.

<sup>5</sup> Two complaints were received regarding driving behavior of project vehicles in the industrial area.

**Table 6 Emergency Response & Health Metrics, Q3 2023**

	July	August	September
Number of ambulance service calls to site	Data will be provided once available.		
Number of fire department service calls to site			
Number of RCMP service calls to site			
Number of meetings held to coordinate and plan emergency response	1	0	0
Number of emergency response-related concerns or complaints	0	0	0
Number of workplace occupational injuries and illnesses requiring treatment at local hospitals <sup>6</sup>	8	9	9
Number of workplace non- occupational injuries and illnesses requiring treatment at local hospitals <sup>4</sup>	29	31	17
Number of workplace injuries or illnesses requiring medevac	0	0	0
Number of recordable occupational injuries	4	6	3
Number of visits to Project medical clinics for non- occupational injury or illness	1,105	1,175	923
Number of notifications to health authorities for occurrence of communicable illnesses/diseases	2	1	3
Percentage of worked who have signed the Worker Code of Conduct	100%	100%	100%
Percentage of workers who have completed Cultural Awareness Training	100%	100%	100%
Number of community health-related concerns or complaints	0	0	0

<sup>6</sup> Total injuries or appointments requiring off-site treatment for Q3 were: 8 x-ray, 91 ER, 2 optometry, 1 dental, 1 lab.

**Table 7 Waste Metrics, Q3 2023**

Waste Streams	July	August	September
<b>(All waste value in metric tonnes unless otherwise stated)</b>			
<b>Waste Sent for Recycling</b>			
Cardboard	37.96	38.63	37.62
Metal, Ferrous & Non-Ferrous	43.67	115.03	116.13
Hard & Soft Plastics	1.74	1.78	1.94
Paper	0.00	3.30	2.24
Electronic Waste	0.73	0.65	0.58
Concrete	56.21	60.32	47.62
Asphalt	0.00	0.00	0.00
Used Oil for Recycling	9.50	9.00	1.60
Recovered Flammable liquids & Glycols	6.36	0.91	0.00
Oily Plastics and IBC Totes (LF Diversion)	0.95	0.07	0.30
Clean wood incinerated onsite (LF diversion)	0.00	0.00	92.40
<b>Total</b>	<b>157.12</b>	<b>229.69</b>	<b>300.43</b>
<b>Cedar Valley Lodge Waste and Water Treatment</b>			
Municipal Waste generated at Cedar Valley Lodge	54.29	40.74	48.51
Influent flow rates from Cedar Valley Lodge wastewater treatment system (m3/day)			
Effluent flow rates from Cedar Valley Lodge wastewater treatment system (m3/day)	27.81	29.20	29.09
Sludge Cake for compost and re-use	93.59	116.24	122.22
<b>Non-Hazardous Waste Disposed at Forceman Ridge, RDKS</b>			
Construction & Demolition (C&D) Waste	66.18	69.26	107.74
Municipal Solid Waste (MSW)	11.03	20.01	51.05
Treated Wood (includes painted wood)	108.95	100.81	91.24
Clean Wood	105.59	114.08	24.29
Organics for compost and re-use (CVL)	37.16	46.76	43.22
Soil as cover	0.00	0.00	0.00
Concrete	0.00	0.00	0.00
<b>Total</b>	<b>328.91</b>	<b>350.92</b>	<b>317.54</b>
<b>Waste Disposed at Approved Facilities Outside of the Region</b>			
<b>Non-hazardous waste</b> disposal to approved facilities outside of the region (Food waste etc.)	15.98	23.09	22.16
<b>Hazardous waste</b> disposal to approved facilities outside of the region ( <i>TDG regulated</i> - landfilled or recovered)	4.73	7.55	2.29
<b>Hazardous, Non- Regulated</b> waste ( <i>non TDG</i> , burial in engineered landfill, Nonregulated liquids & solids)	16.60	23.73	12.57
<b>Total Project-generated Waste Solids</b>	<b>655.35</b>	<b>782.05</b>	<b>824.12</b>
<b>Total Project-generated Waste Liquids</b>	<b>43.67</b>	<b>39.11</b>	<b>30.69</b>
No. of municipal utility related concerns or complaints	0	0	0

## 2024 SMR DATES

<p>Tentative: February 13</p>	<p>Project Update</p>	<p>SMR participants will have an opportunity to attend a virtual project update, which will include a Q&amp;A with the Project team.</p> <p>The focus of the update will not follow SMR working groups but offer an opportunity to better understand what is happening on the LNG Canada project site.</p>
<p>May 14 - 15</p>	<p>In-Person SMR</p>	<p>Two-day session, all working groups<sup>7</sup>          Project Metrics, Q4 2023 – Q1 2024  <b>Preferred Location:</b> Kitimat, Kitamaat</p>
<p>October 8 - 9</p>	<p>In-Person SMR</p>	<p>Two-day session, all working groups<sup>7</sup>          Project Metrics, Q2 – Q3 2024  <b>Preferred Location:</b> Terrace, Kitsumkalum, Kitselas</p>

<sup>7</sup> Community Amenities will not be convened unless requested by working group members, or there are changes in current trends.
